

PROTECH

ELECTRONIC SERVICES LIMITED

MISSION STATEMENT

To provide contract manufacturing and test facilities which meets customer's needs in relation to printed circuit boards, electromechanical equipment and cable assemblies.

ABOUT US

Protech Electronic Services Limited offers a comprehensive range of electronics equipment manufacturing and test services including, printed circuit board assembly both through hole and surface mount; all type of cable assemblies and looms, with core competency in RF and semi-rigid cable assemblies. We have both RoHS and non-RoHS processes in place.

All services are tailored to meet the demands of customers both large and small to meet specific technical and quantity requirements from prototyping to high volume production. Protech has successfully demonstrated the ability to meet customer's expectations, and consistently delivers high quality, flexible manufacturing solutions at competitive costs.

CABLE ASSEMBLY

Protech Electronic Services (PESL) has the capabilities to manufacture prototype through to volume production of cable assemblies. We specialise in standard and bespoke assemblies and not limited to:

- Ribbon
- IDC/IDT
- Multicore
- D Type
- RJ series
- USB
- RF- SMA/SMB/MMX/BNC/TNC
- Semi Rigid-UT141SA-MIL17/ALTP

PCB ASSEMBLY PLUS

We specialise in surface-mount and through-hole assembly of printed circuit boards, box builds from prototype to volume production, with both RoHS and non RoHS processes.

We also offer product and printed circuit board layout design, test and debugging of circuits assistance.

Please enquire with your requirements.

flexible solutions for all your electronics assembly and cabling needs...

RF DESIGN & TEST

We offer a comprehensive design, testing, analysis of RF cables and systems services and not limited to:

- gain
- linearity
- impedance matching
- full S-Parameter analysis
- power and frequency measurements
- intercept point, compression points
- 2nd, 3rd order intermodulation
- spectral regrowth

QA POLICY

PESL is ISO 9001: 2000 accredited and is fully committed to providing the highest levels of satisfaction to customer's placing work with it, the company will actively work with organisations to determine the best method of meeting their requirements in any particular circumstance.

SUPPLY CHAIN MANAGEMENT

We source all of the material from an established group of suppliers who offer us competitive pricing and lead times. These benefits can be passed directly on to our customers.

PESL offers either full or partial procurement service depending on the individual requirements of each customer.

Alternatively, we can operate with customers free issuing kits (customers supply all materials).
